# International Partnership on Mitigation and MRV

## Success Factors for implementation of INDCs

## Success Factors:=

factors we cannot influence ourselves,  
which help (or halt) the implementation and  
achievement of targets

Our INDC worked out fabulously! We are right on track and enjoy all those co-benefits!

Our INDC did not work out at all, and our growth is stalling anyway. I don't know what went wrong, but my consultants must have made a mistake

What can be a success factor why A's INDC worked out?

What can be barriers why B's INDC might stall?

What can be decided or influenced by policy-makers?

Are there components of an INDC to reflect that?

What has to come from other stakeholders or must be a given condition under which governments and stakeholders operate?

Are there components of an INDC to reflect that?
