Developing a national climate compatible development plan (CCDP)

Case Information

Activity: Conceptualization, stakeholder consultation, technical development and initial policy impact of a national climate compatible development plan

Country: Dominican Republic

Sector(s) involved: Energy
Transport
Waste
Cement
Tourism
Forestry

Region: America

Good Practice: Long term impact
Leadership and political commitment
Stakeholder participation
Integrated into existing processes

Timeframe: 2011

Case summary: The Dominican Republic, through the leadership of the President's Office, developed a Climate Compatible Development Plan (CCDP) that presents a roadmap to double the size of the economy in twenty years while at the same time cutting emissions by half (a reduction of around 18 MTCO₂e). The Plan was endorsed and launched by the President in September 2011 and presented at the UNFCCC-COP 17 in Durban[1] that same year.

The screenshot shows the website for the Global Good Practice Analysis (GPA) webinar series 2016. The navigation bar includes: About, Regional Groups, Topics, Good Practice, News, Events, Projects/Initiatives, Resources, Links. The main content area is titled "Webinar series" and features a lightbulb icon containing a document, a globe, and a recycling symbol. The text describes the webinar series, its objectives, and provides links for more information. Logos for UNDP, Low Emission Capacity Building Programme, and the International Partnership on Mitigation and MRV are displayed at the bottom of the content area.

Webinar series

The Global Good Practice Analysis webinar series 2016

The International Partnership on Mitigation and MRV and the [UNDP Low Emission Capacity Building Programme](#) have the pleasure to invite you to a series of webinars on The Global Good Practice Analysis (GPA) on INDCs, LEDS, NAMAs and MRV systems.

The objective of the webinar series is to share the **Global Good Practice Analysis (GPA)** and highlight the respective case studies as well as to provide a platform for practitioners in the field to ask specific questions to national colleagues and engage in peer-to-peer exchange. This objective will be realized through a dedicated webinar series that will highlight the case studies and analysis conclusions over the course of 6-7 months.

>> Find more information on the GPA 1.0, 2.0 and all 40 cases [here](#)
>> Find all information on the webinar series below (page will be updated regularly).
