Climate Change

WBG Climate Change Action Plan explicitly points to NDC implementation

- *“The WBG will support countries in translating their NDCs into climate policies and investment plans into actions.”*
- *“With selected partners, the WBG will create, share, pilot, and implement new and innovative solution packages that answer client countries’ demands, especially those linked to their NDCs, and continue contributing to the global debate on climate and development.”*
- *“Easily accessible, consolidated ‘one stop shop’ data will be made available to all staff on climate impacts, NDCs, climate finance, analytic tools and methodologies.”*

NDC implementation support is already showing up as part of our regular technical assistance and investment lending work

Note:

- SCD Systematic Country Diagnostic
- CPF Country Partnership Framework
- PLR Performance and Learning Reviews
- CEN Country Engagement Note

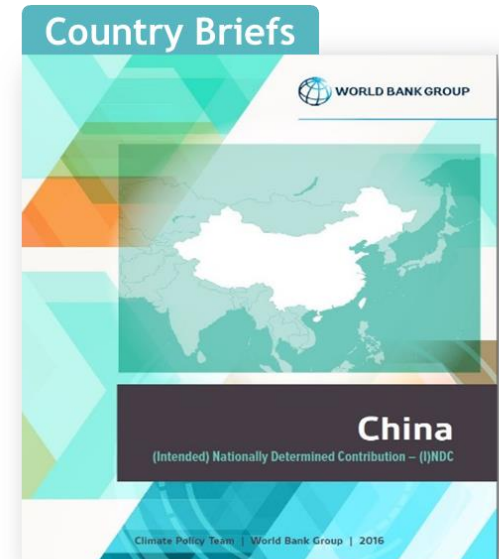

To facilitate mainstreaming of NDC implementation into our regular investment lending and technical assistance work we are also:

- WBG-wide NDC working group that meets every 4-6 weeks
- Guidance to sectoral and regional teams on country-level NDC priorities
- NDC content database (NDC Platform) and country briefs, providing standardized information on the contents of every NDC submitted to the UNFCCC
- IFC analysis of private sector investment opportunities linked to NDC implementation

New targeted NDC technical assistance initiative: *Climate Action Peer Exchange (CAPE)*

- Launched by the Kingdom of Morocco and WBG at COP22.
- Seeks to help **Finance Ministries build capacity to design fiscal policies to support NDC implementation** and realize the benefits that well-designed fiscal climate policies can have for more traditional, non-environmental objectives of Finance Ministries.
- Creates a **community of practice** promoting peer exchange, self-evaluation + sharing of best practices.
- Key issues for discussion may include **climate-informed budgeting, carbon pricing, green taxation, green bonds, risk insurance, fossil fuel subsidy reforms, and macroeconomic modelling of climate risks** and NDCs.

2017 Scheduled Activities		
April 20-21	WB/IMF Spring Meetings	CAPE announcement at Carbon Pricing Leadership Coalition High Level Assembly + Partnership Meeting deciding the work program
May 23-24	CAPE technical workshops	CAPE event on managing impacts of climate change on public debt at DMF Stakeholders Forum in Vienna and Innovate4Climate conference in Barcelona
July 10-14	Regional workshop for Asian Finance Ministries	CAPE training on Fiscal Environment Reforms, Resilience and Debt Sustainability, at Asia-Pacific Finance and Development Institute, Shanghai
TBD	Series of technical workshops	Workshops for aligning climate and fiscal policies, relating to fiscal instruments, climate policy financing frameworks, macroeconomic modeling, public investment planning techniques, and fiscal risk assessment.
