
Lebanon in the process of preparing an INDC

Yara Daou – Ministry of Environment

MRV Summer School 2014
September 4, 2014 – Punta Cana, Dominican Republic

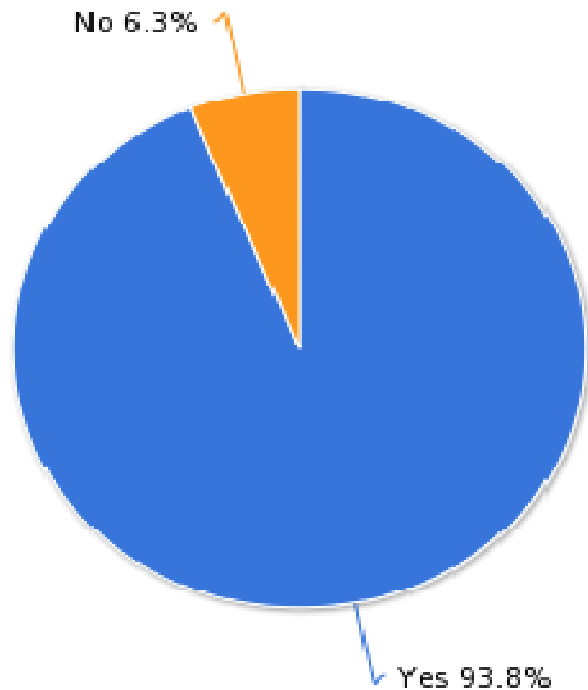

The large picture

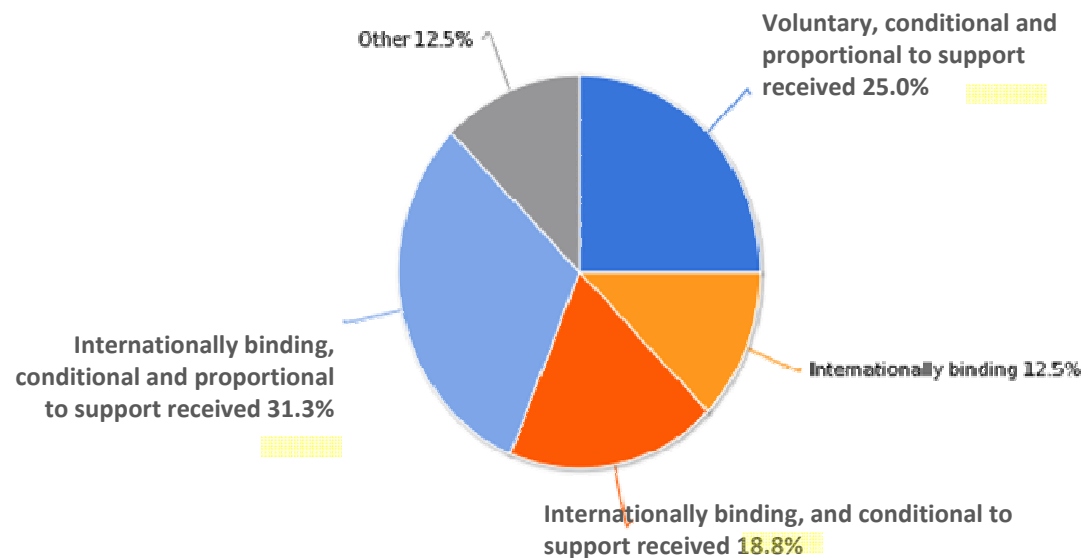

MoE: analysis of what's at stake in CC Negotiations and design of national expert survey

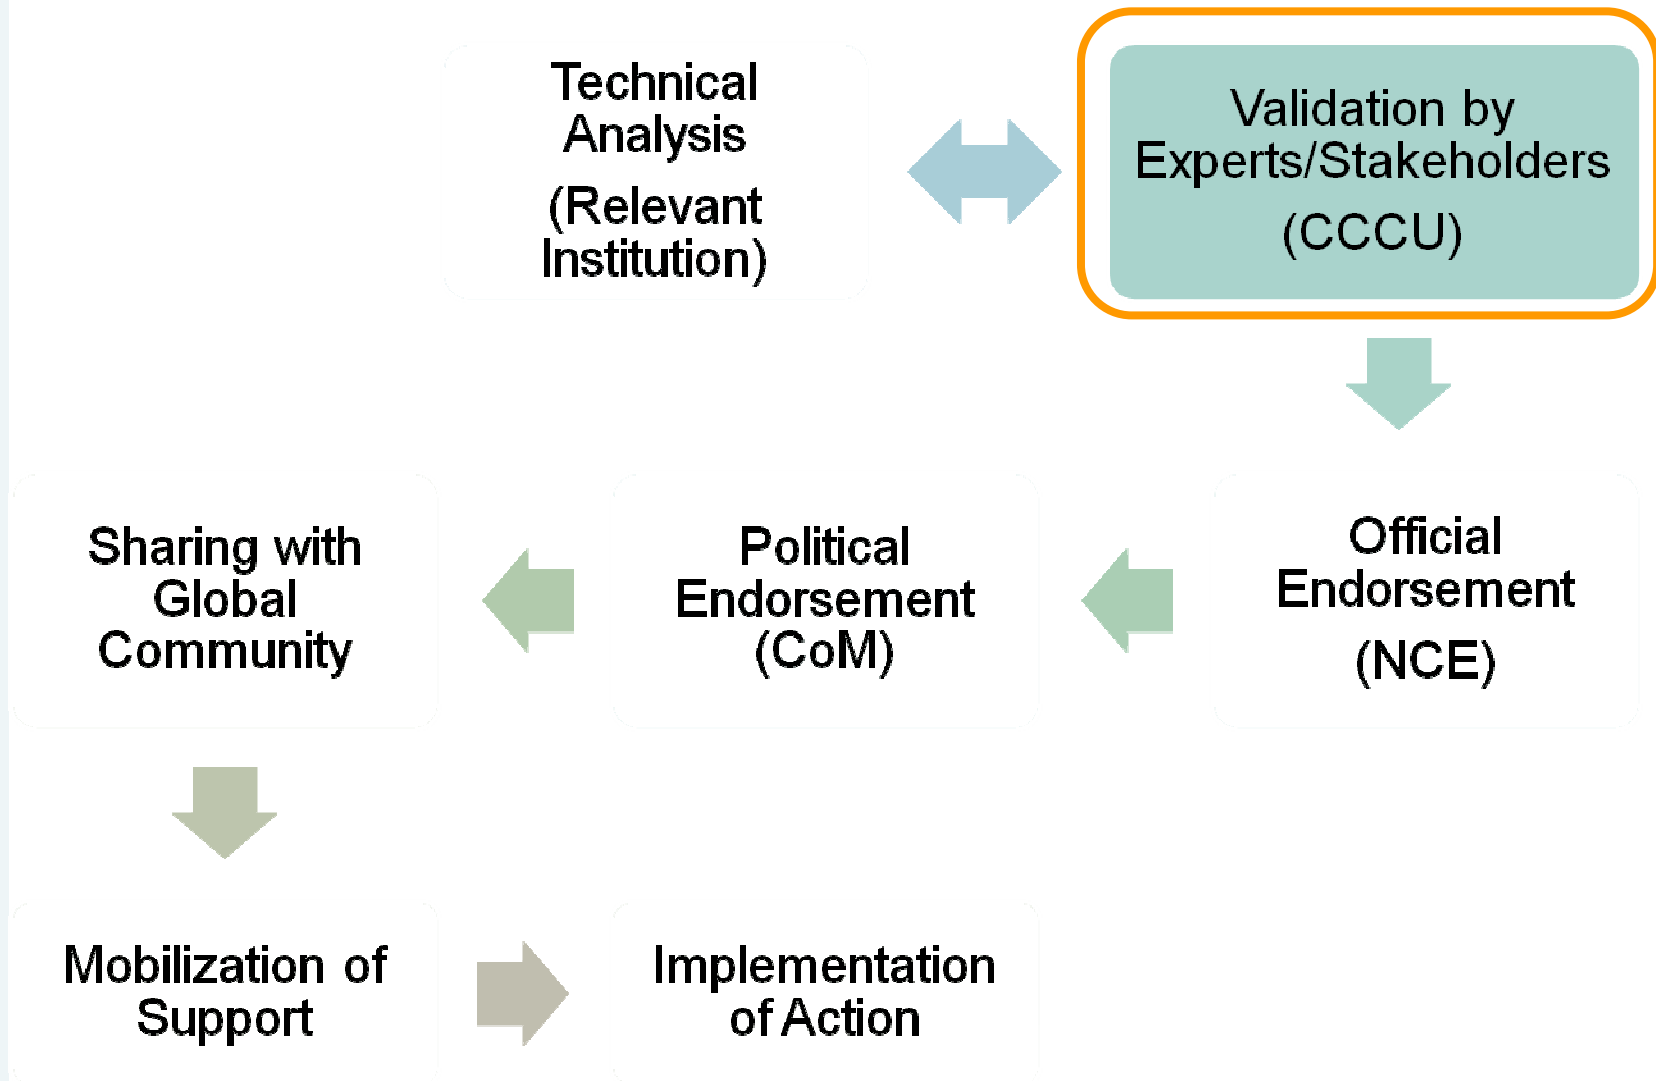

Should Lebanon submit an INDC?

What should be the legal aspect of INDCs?

CLIMATE CHANGE

1st National Consultation Meeting on INDCs

- Held in April 2014
- Decisions:
 - × INDCs = opportunity to showcase Lebanon's mitigation actions
(LEDS/ NAMAs/ Fiscal Incentives to reduce emissions/ 12% RE)
 - × INDC should include an **adaptation** component

Action plan for preparation of INDC

Task	Responsibility
Identify priority sectors	MoE
Identify past/current mitigation and adaptation activities that can be included as nationally funded contributions	IndyAct (NGO) IFI (Academic Institute)
Identify appropriate Upfront Information	All stakeholders
Research upfront information for Adaptation	All stakeholders
Research on differentiation indicators	All stakeholders
Research regional INDCs	IndyAct (NGO)

Where we are: 2nd consultation meeting – August 2014

Identify activities to
be included as
nationally funded
contributions

- Climate Public Expenditure and Institutional Review (MoE + MoF)
- Institutional mapping of national climate change activities (MoE)

Priority
sectors

- Testing the threshold of pain
 - Impact on the economy of moving from conventional electricity sources to RE sources by 2030
 - Optimal fleet composition with optimal economic impact and CO₂ reduction

Adaptation
and
differentiation

- Very preliminary results. A lot needs to be done, not within the scope of stakeholders' work. Funds and times constraints

More clarity on content of INDC

Challenges...

- Lack of knowledge on shape of INDCs
- Lack of financial and human resources

Technical Analysis
(Relevant Institution)

Validation by Experts/Stakeholders
(CCCU)

Lack of clarity on commitment and accountability of party to INDC

Sharing with Global Community

Mobilization of Support

Political Endorsement
(CoM)

Official Endorsement
(NCE)

- “Blurry” political directions/instructions
- Regional Instability = different priorities

Implementation of Action

Risk of not meeting deadline for presentation of INDCs

... and how we are planning to overcome them

Lack of knowledge on shape of INDCs
Lack of financial and human resources

- Capacity Building, trainings
- Mobilize funds for recruitment & implementation
- Work extra hours!

Lack of clarity on
commitment and
accountability of
party to INDC

Work on a
contribution that
is as ambitious
as national
circumstances
allow

- Multiply efforts in CCCU
- Focus on economic, social and environmental co-benefits

- “Blurry” political directions/instructions
- Regional Instability = different priorities

Present what is
available as a sign
of Lebanon’s
commitment to
climate action

Risk of not meeting deadline
for presentation of INDCs
