

International Partnership on Mitigation and MRV

March 27, Windhoek, Namibia

**Jongikhaya Witi, Department of
Environmental Affairs, South Africa**

**Sven Egbers, International
Partnership on Mitigation and MRV**

About the Partnership

Launched by South Africa, South Korea and Germany at the Petersberg Climate Dialogue in 2010, the Partnership encourages countries to step up mitigation ambition and carry out the transformation to a sustainable low-carbon society.

To this end, the Partnership supports the design, set-up and effective implementation of

- Low-Emission Development Strategies (LEDS);
- Nationally Appropriate Mitigation Actions (NAMAs);
- Intended Nationally Determined Contributions (INDCs);
- Measuring, Reporting and Verification (MRV) systems.
