Building and Nuclear Safety

of the Federal Republic of Germany

Biennial Transparency Report Guidance and Roadmap Tool

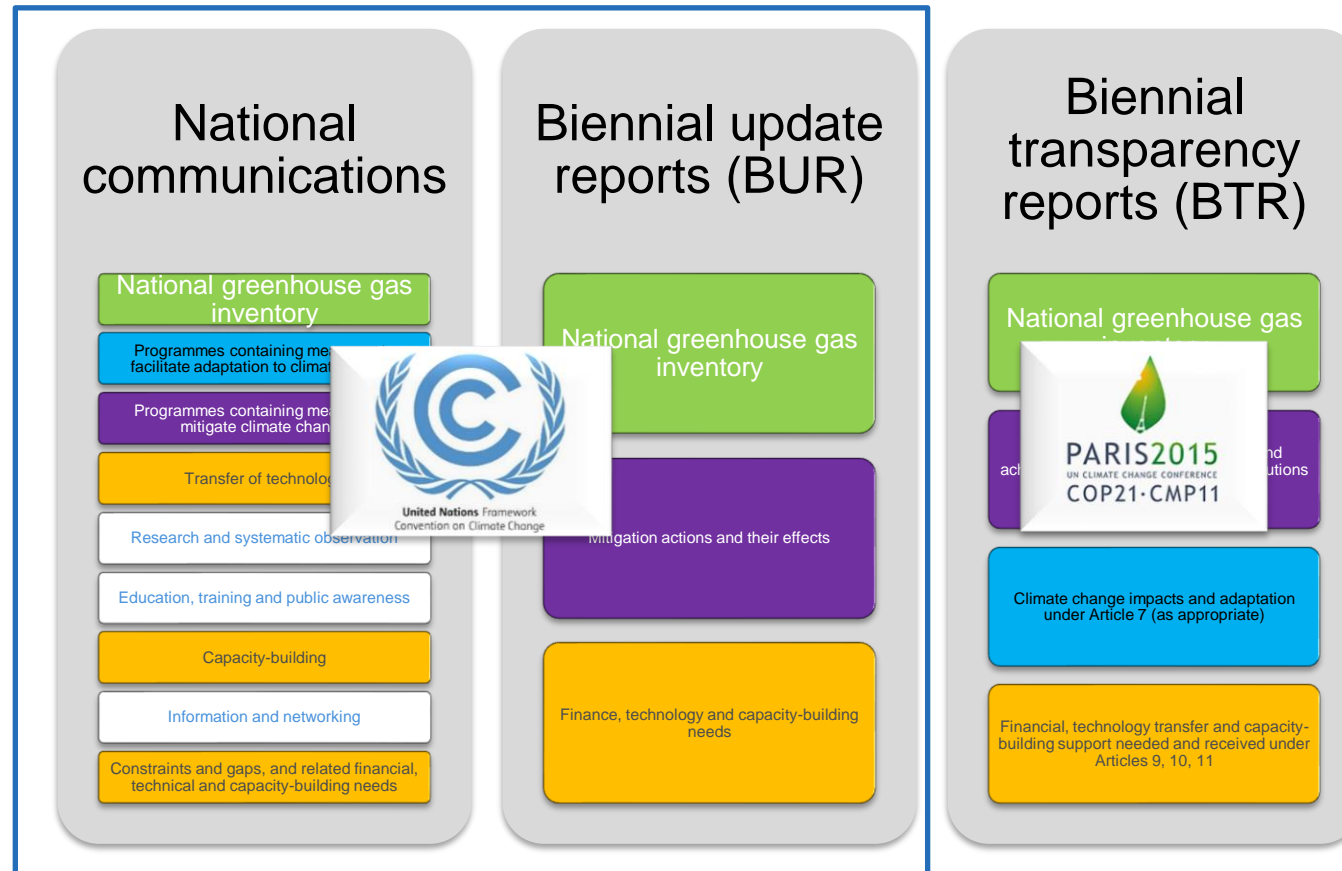

- A collaborative effort of FAO and PATPA
- Based on experiences on MRV and transparency-related projects
- Objective: support countries in planning the preparation of their first biennial transparency report

Current Framework

Future Framework

What do we need this tool for?

- Ensure a smooth transition from reporting BURs to BTRs
- Guide the design and set-up of the transparency system underpinning the BTR process
- Get an orientation of the time required for the BTR implementation

How does this tool work?

- 1) **Six main steps**
- 2) Guidance and recommendations to **improve the quality of the process** over time
- 3) Questions posed to **check national circumstances and reporting capacity**
- 4) **Elaboration of a country-driven roadmap** (time based on assumptions)

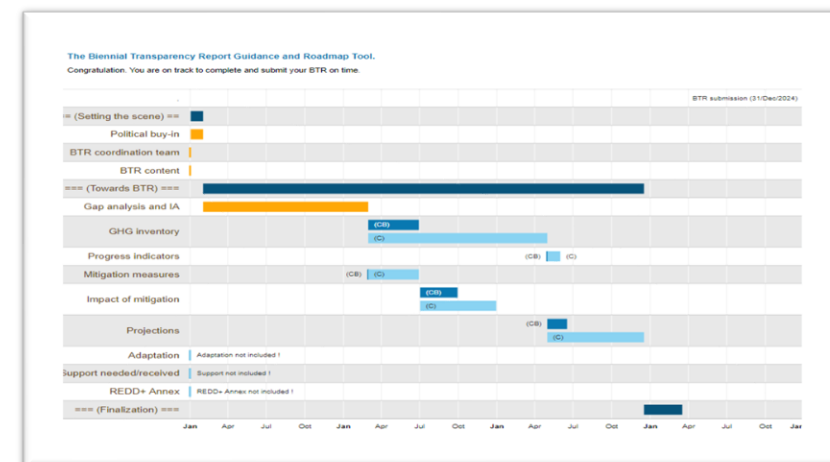

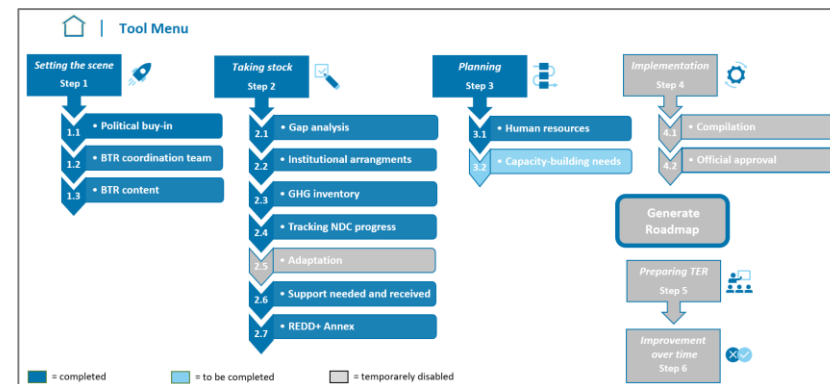

Main elements of the tool

Stocktaking: help countries map out what the current in-country reporting arrangements are

ETF Requirements Mapping: guide countries to understand the new requirements and planning for the BTR implementation

Roadmap generation: provides a summary of the necessary steps leading up to the BTR with *indicative* required time period to complete capacity development needed

Six steps to get ready

Setting the scene and appointing the BTR coordination team

Taking stock of current MRV arrangements

Planning phase

Implementation

Preparing for the technical expert review

Improvement over time

What's next?

Testing: few countries are already testing the tool for feedback and comments

Application: the tool is **available online** with the documentation for easy use by country experts. FAO and PATPA will be available on request for providing more insights on country implementation

And how does the tool work in practice?

Let's find out!

Thank you for your participation!
