

## Glossary

**Biennial update report (BUR):** the BUR provides an update to the most recently submitted national communication. The core elements include an update on the national greenhouse gases (GHG) inventory, information on mitigation actions taken and their effects, and an outline of their needs and support received. Together with the national communication, the BUR is the national report that Parties are required to submit prior to the Paris Agreement, based on the Convention (Article 4 and 12) and more recent Conference of Parties decisions.
