

CTF tables for projections

CTF 7-9: Projections of GHG emissions and removals

CTF 10: Projections of key indicators

CTF 11: Key underlying assumptions and parameters used for projections

WEM, WAM and WOM scenarios

Examples:

- Projections of GHG emissions and removals in the scope of the NDC
- Projections of GHG intensity

Examples:

- Development of population, GDP and energy prices

Flexibility provisions for projections (paragraphs 92, 95 and 102 of the MPGs)

92. Each Party shall report projections pursuant to paragraphs 93–101 below; those developing country Parties that need flexibility in the light of their capacities are instead **encouraged** to report these projections.

95. Projections shall begin from the most recent year in the Party's national inventory report and extend at least 15 years beyond the next year ending in zero or five; those developing country Parties that need flexibility in the light of their capacities with respect to this provision have the flexibility to instead **extend their projections at least to the end point of their NDC** under Article 4 of the Paris Agreement.

102. Those developing country Parties that need flexibility in the light of their capacities with respect to paragraphs 93–101 above can instead report **using a less detailed methodology or coverage**.
