
Monitoring and reporting on adaptation action – the Brazilian experience

8th Annual Partnership Retreat (APR) 2019 of the Partnership on Transparency in the Paris Agreement “Enhanced Transparency Framework: Getting ready for the transition.”

- Beirut, Lebanon -

18 to 23 October 2019

COORDENAÇÃO GERAL
DO CLIMA

SECRETARIA DE
POLÍTICAS PARA A FORMAÇÃO
E AÇÕES ESTRATÉGICAS

MINISTÉRIO DA
CIÊNCIA, TECNOLOGIA,
INOVAÇÕES E COMUNICAÇÕES

Adaptation agenda regulating framework

National Policy on Climate Change
(Law No. 12,187/2009)

Objectives:

Art. 4º,V - “implementing measures to promote adaptation to climate change **across the 3 (three) levels of the Federation...**”

Guidelines:

Art. 5, III – “adaptation measures to reduce the adverse effects of climate change and vulnerability of environmental, social and economic systems...”

NDC

Decree No. 9073/2017

Official Gazette 11/05/2016
Directive No. 150
Enactment of NAP

Coordination:

Technical Adaptation Group: promotes liaison among agencies for implementation, monitoring, evaluation and review of NAP

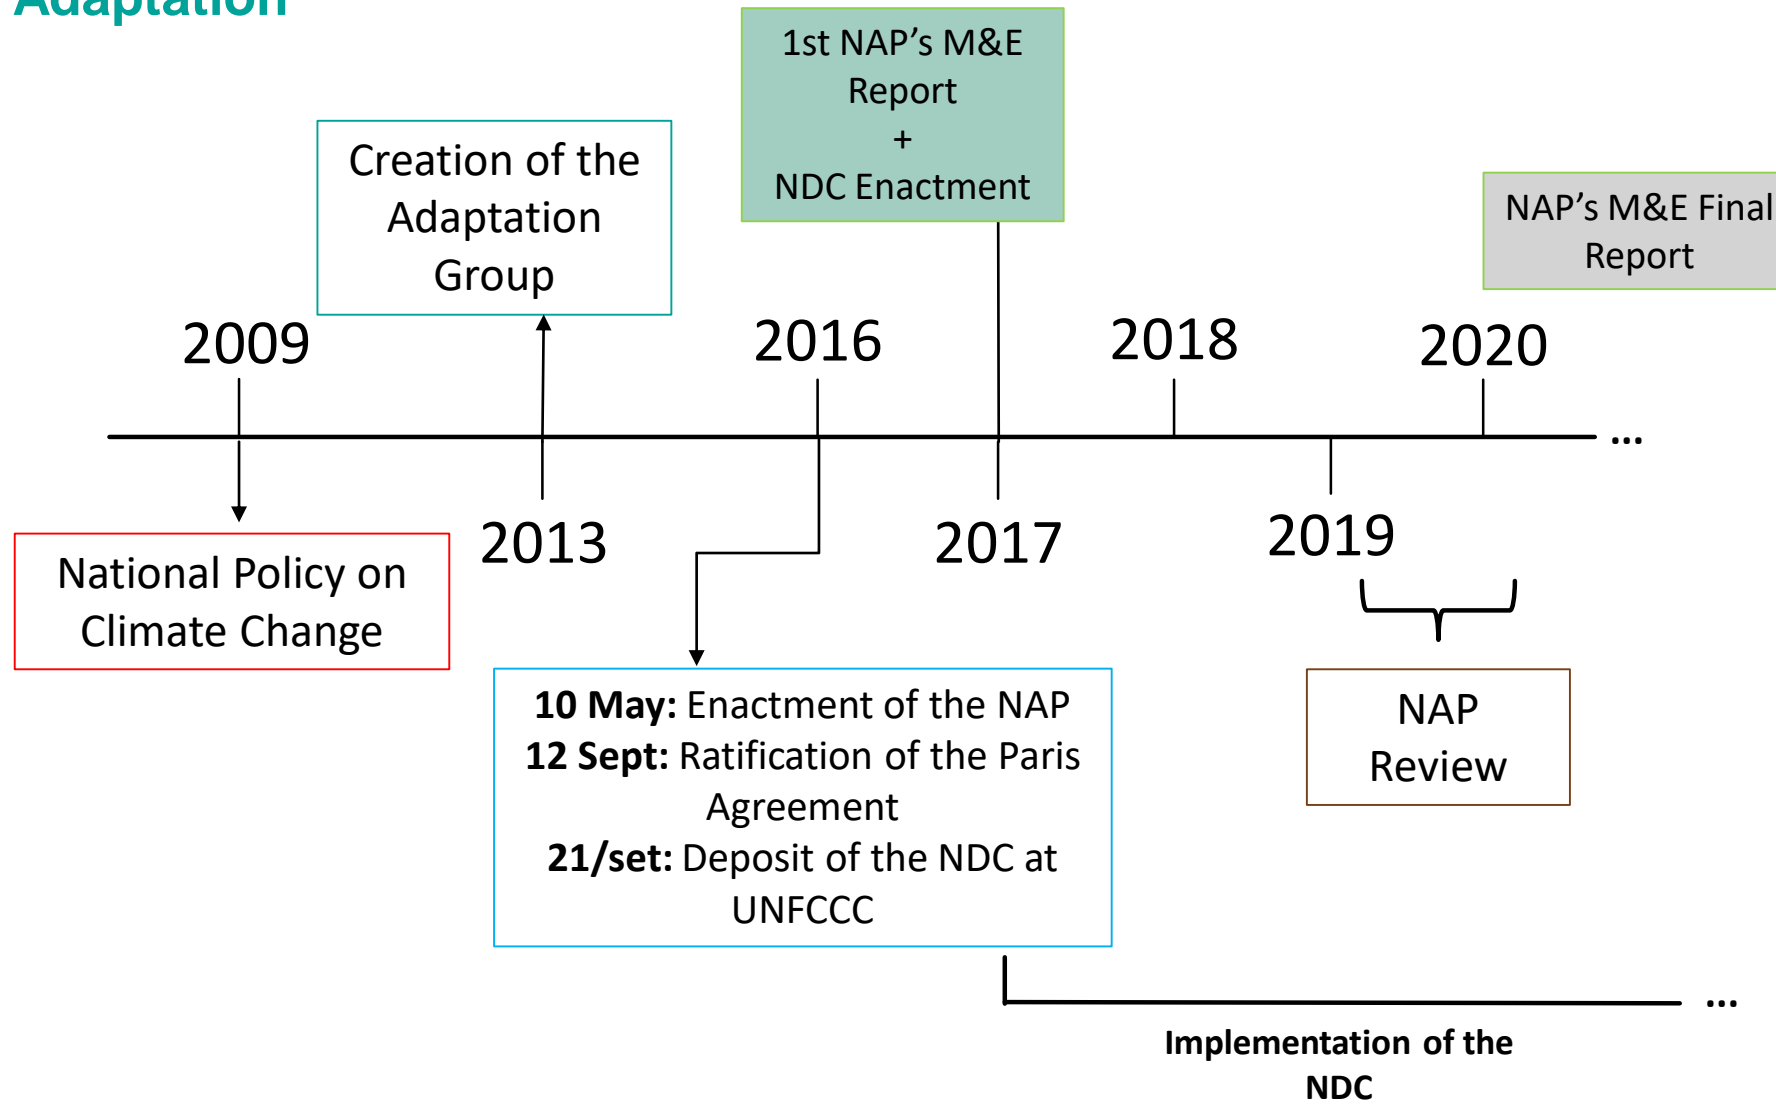

Implementation:

Federal Government together with the States + Federal District + Municipalities + Civil Society + Private Sector

Execution:

Bodies and Entities Assigned as Focal Points & Responsible for Accomplishment

Timeline – Adaptation

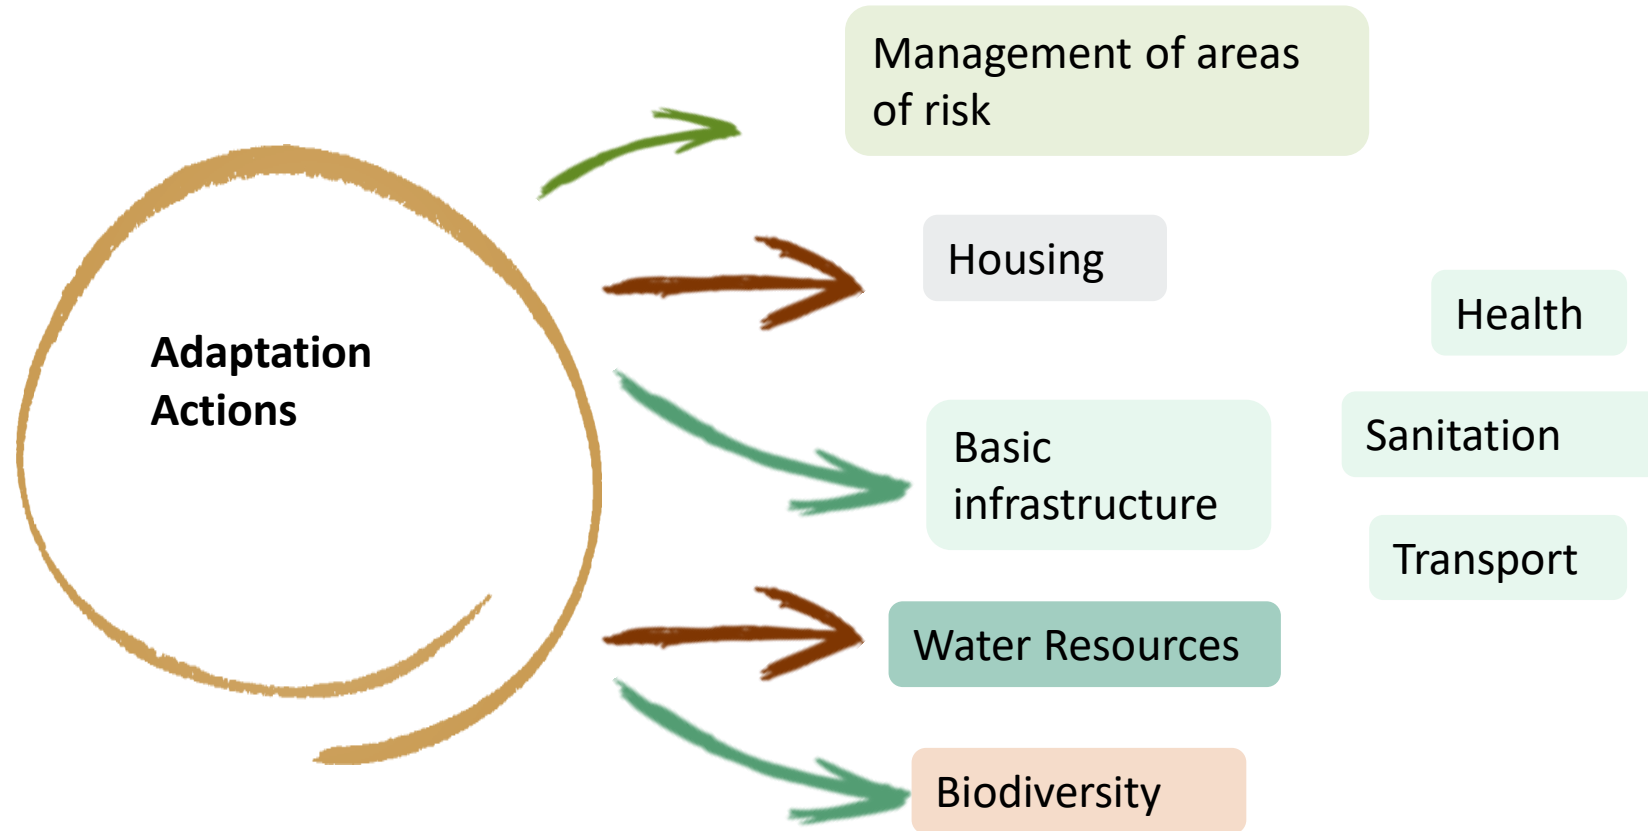

The NAP process

3 years: 2013-2016

- ✓ 28 meetings of the Adaptation Group;
- ✓ 11 Sectoral/ Thematic Fragments;
- ✓ 13 Ministries/ 18 Institutions;
- ✓ Brazilian Forum on Climate Change;
- ✓ 6 thematic networks: water, biodiversity, sanitation, Coastal Zones, Vulnerable Populations, Health;
- ✓ 2 public consultations, 5 on-site workshops;
- ✓ 4 Boards: Human Resources, Biodiversity, Sanitation, Industry;
- ✓ Scientific community: PBMC and Rede Clima;
- ✓ Total of 197 meetings.

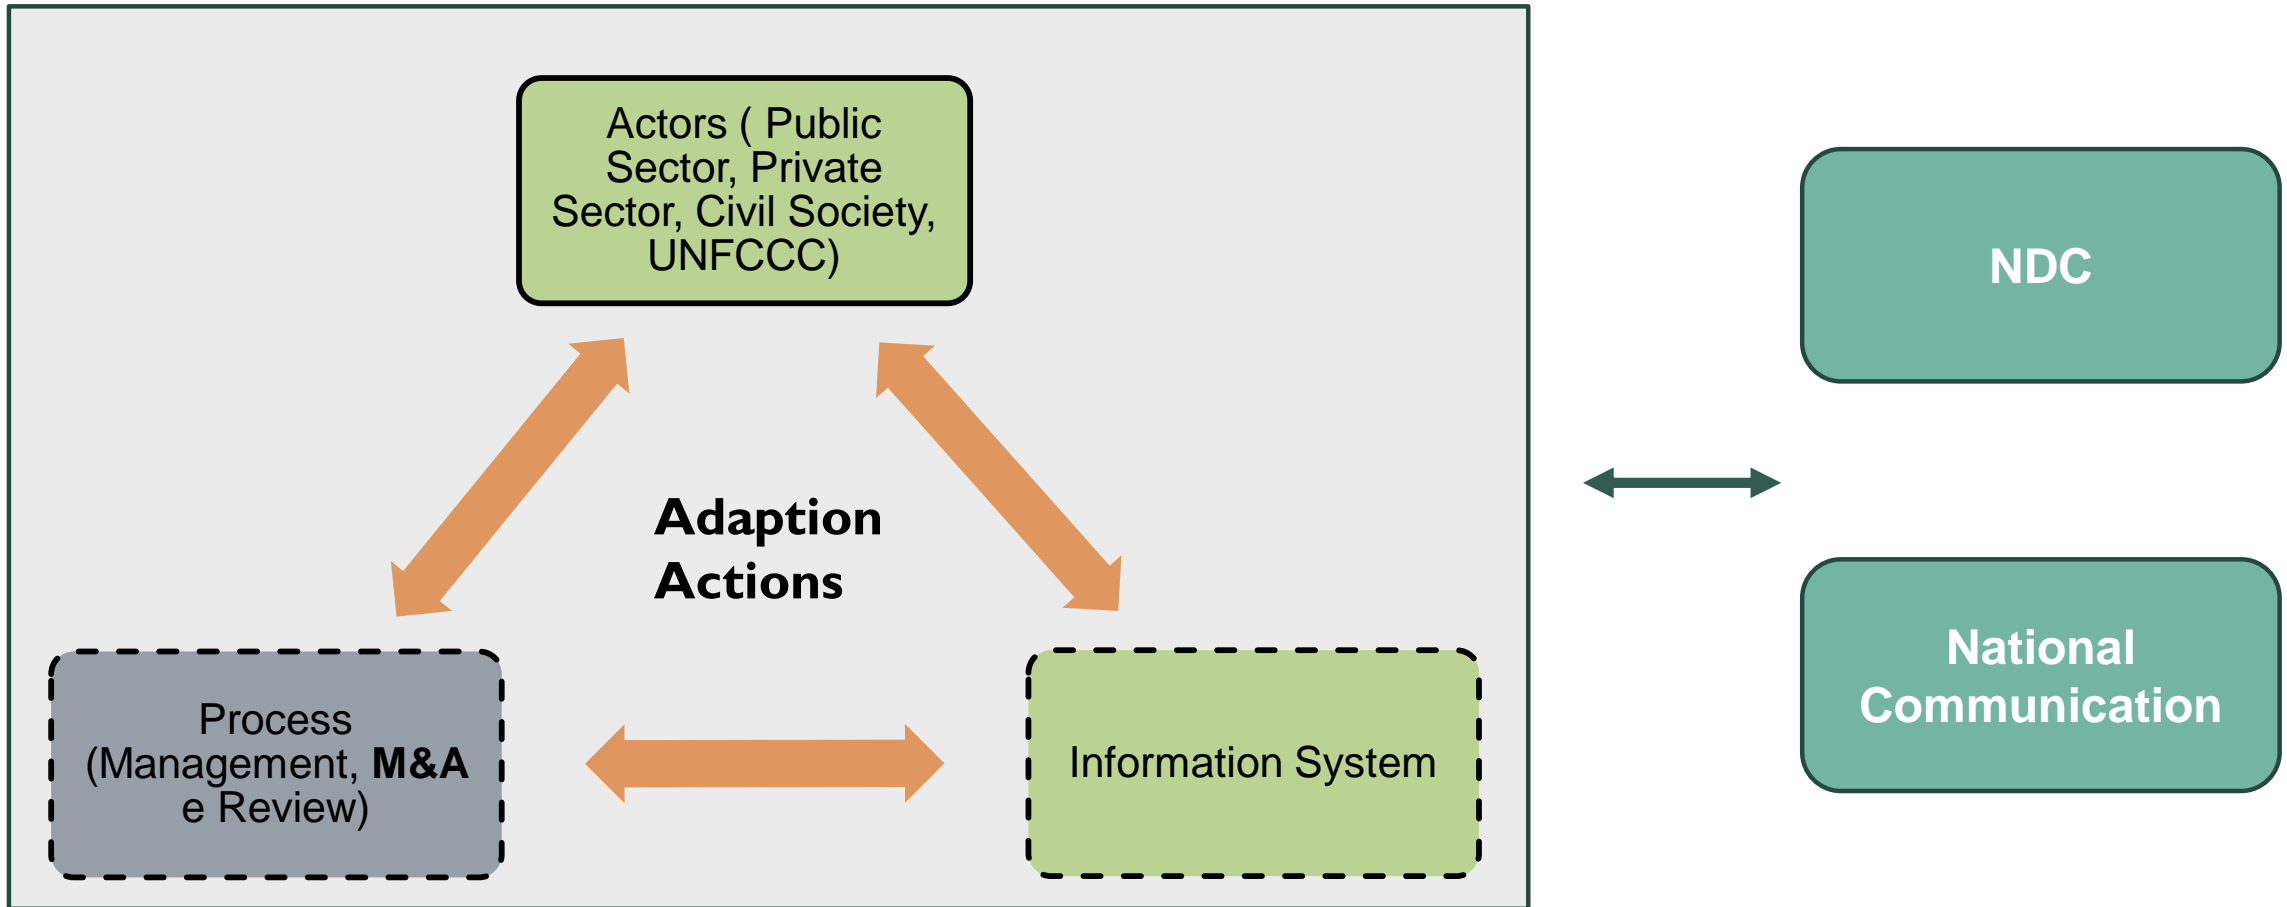

Nationally Determined Contribution

NAP's main features

1. **Executions Cycle:** 04 years
2. **Review** should happen at the last year of the cycle (May 2019/ May2020);
3. **M&E Systematic** (indicating the content, format and periodicity)
4. **Implementation Plan** of the goals and guidelines prepared at the first year;
5. The M&E should be **integrated** to the information System about the PNMC and other systems, for example the PPA;
6. What should be monitored:
 - A) goals and guidelines;**
 - B) activities and processes;**
 - C) progress and challenges** identified during the incorporation of the climate risk management into the subnational activities and civil Society policies;
7. Dissemination of the information under the official websites of the government (MMA for example)

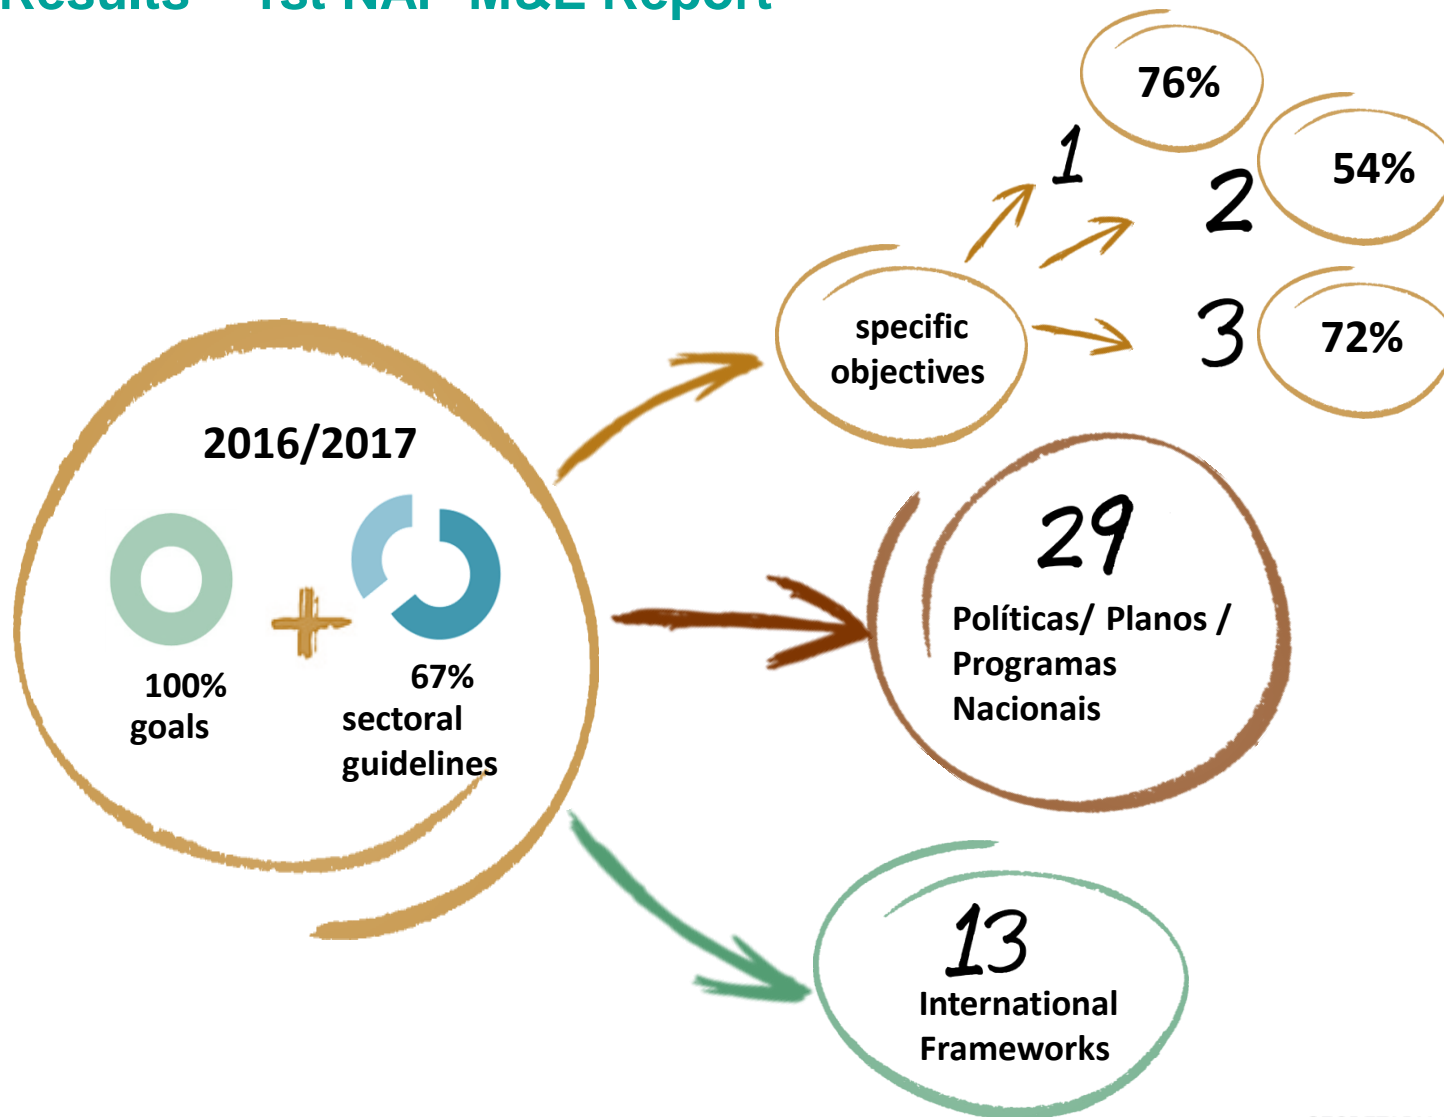

NAP's Management system

Monitoring & Evaluation

Main Results – 1st NAP M&E Report

The NAP contributed toward the enforcement of the **Sendai Framework for Disaster Risk Reduction**, and the **United Nations Sustainable Development Goals (SDGs)**, regarding to that one, it has contributed toward the achievement of 12 of the 17 SDGs, and 45 of the 169 proposed targets, thereby reaffirming Brazil's interest in expanding its contribution toward achievement of the objectives of the Climate Convention, within the context of sustainable development.

Challenges

- To improve knowledge on risks and impacts associated to climate change, make an appropriate allocation (**appropriate timescales and fragments**)
- To promote **additionality**/insertion of risk in the investment (how much to be adapted?)
- Knowledge systematization and availability (Adaptaclima/ Educaclima/ Impactaclima)
- Horizontal and vertical coordination (government / other sectors of society)
- Financing
- Continuous mobilization / awareness-raising process
- Dissemination of studies such as Brazil's vulnerability map to droughts, floods and landslides, by municipality / Population Vulnerability Project (Fiocruz) / Atlantic Forest Vulnerability (to be inserted in public policies)
- Regional cooperation in adaptation processes (Euroclima/Iki....)
- Review the NAP (in line with reality/ consider quantitative goals)

THANK YOU!
