BTR Finalization and NDC Alignment Workshop

&

6th Caribbean Cooperative MRV Hub Annual Meeting

Saint George's, Grenada | 1st April – 4th April 2025
Radisson Grenada Beach Resort

Background

The year 2024 was a key year for the Paris Agreement, as another piece of the system entered into full force: the **Enhanced Transparency Framework (ETF)**. The ETF is a central component of the design, credibility and operation of the Paris Agreement. According to the modalities, procedures and guidelines (MPGs) of the ETF, Parties to the Paris Agreement shall submit their first Biennial Transparency Reports (BTRs) by 31 December 2024. Many countries are facing a variety of challenges which hindered a timely submission. Yet, despite this deadline passing a submission as soon as possible is still of importance as BTRs are part of a regular cycle of reporting and review, which is essential for creating trust and accountability among Parties. Finalized BTRs additionally aid the NDC Updating Cycle in 2025 and serve as a key input for the Global Stocktake that will take place in 2027.

Objective

Against this background, the Partnership on Transparency in the Paris Agreement (PATPA) with the support from the Capacity Building initiative for Transparency – Global Support Program (CBIT-GSP) GEF funded project and the United Nations Framework Convention on Climate Change (UNFCCC) will host a Caribbean workshop on **BTR Finalization and NDC Alignment**, which is intended to build on the outcomes of the PATPA Global BTR Dialogue and the CBIT GSP Capacity Needs Assessment, and disseminate them among the Caribbean partner countries from April 1 – 3, 2025.

This workshop will be followed by the **6th Annual Meeting of the Caribbean Cooperative MRV Hub** on April 4, 2025.

The main objective of this workshop is to provide targeted technical support to country Parties with a **space to discuss the process of developing the first BTR, provide them on tools and materials to support their prompt submission of BTRs to the UNFCCC and exchange on common technical challenges**. It will provide **“troubleshooting sessions”** for those Parties

who have not yet submitted their BTRs and **“improvement planning sessions”** for those who have. For interested Parties, opportunities to learn and prepare for technical expert reviews (TERs) will be shared. Specifically, the workshop will be designed in a manner to:

1. Provide in-depth technical advice on the application of the MPGs;
2. Provide an opportunity to gain hand-on experience on the use of the UNFCCC ETF reporting tools
3. Facilitate feedback from the peers of their on-going work on different chapters of BTRs;
4. Promote sharing of lessons learned and experiences, particularly in overcoming certain technical issues and challenges;
5. Encourage improvement plans and prepare for TERs.
6. Explore the interlinkages between the BTR and the NDC cycles.

Following this workshop, the 6th Annual Meeting of the Caribbean Cooperative MRV Hub will convene the MRV Hub member countries to reflect on the work of the MRV Hub, including project achievements and upcoming opportunities for collaboration.

Outcome

The proposed outcome of the workshop is twofold. First, for participating countries to get their BTRs closer to completion through peer advice and troubleshooting sessions, including hands-on training on the UNFCCC reporting tools. Second, to help participating countries reflect on their BTR submissions, including linkages to the NDC cycle, improvement plans, and preparation for the upcoming TERs.

Format

The exchange combines expert inputs and interactive elements during **3 workshop days** and **1 annual meeting day**, within a **safe and confidential space**. The working language of the workshop will be **English**.

Expert input

Experts will hold brief technical presentations on selected topics to set the scene for technical discussions and peer exchange. The focus will be on the mandatory BTR reporting elements, sharing lessons learned and highlighting solutions on how to fulfil these requirements.

Expert advice and feedback serve to overcome technical issues and challenges that the participating countries are facing with the preparation of their BTRs and to help countries with their improvement plans and preparation for TERs and NDC Monitoring/Tracking.

Interactive sessions

Interactive sessions and case-clinics will focus on peer-to-peer exchange and will allow participants to share best-practices and identify solutions.

Gender and Diversity

The workshop is dedicated to using **inclusive alternatives, avoiding stereotypes and language that encourages subordination and trivialisation**. Using gender-sensitive language and inclusive formulations ensures that all people are treated with equal value, challenges

6th Annual Meeting of the Caribbean Cooperative MRV Hub

Background

The CCMRVH is a regional service institution established to foster regional technical excellence and enhance policy-relevant carbon accounting across 12 English-speaking CARICOM countries.

The CCMRVH offers **technical services** designed to support Caribbean governments in fulfilling the analytical and reporting requirements of the Paris Agreement and transition to the ETF. The CCMRVH utilizes its in-depth understanding of local challenges and opportunities, to ensure that its services are not only effective but tailored to the unique needs of Caribbean countries.

The CCMRVH prioritizes the **development of regional expertise** through capacity-building programs such as training and mentorship, ensuring that countries can sustain climate reporting efforts independently in the long term.

Meeting Objectives

The sixth annual meeting of the Caribbean Cooperative MRV Hub is a convening of the MRV Hub member countries to provide a high-level reflection on the work of the MRV Hub including project achievements and upcoming opportunities for collaboration.

It will highlight country experiences through case studies, share insights on MRV Hub services, and facilitate small group discussions for countries to exchange practical strategies, best practices, and experiences in developing their BTRs and advancing their NDC commitments
