

# Global NDC Conference 2019

## Inspiring action and enabling change

12 to 14 June 2019 - Berlin, Germany

### Programme overview

At the conference, three main themes will steer the conversations: *integrated governance, finance mobilisation and transparency. Sector approaches, gender and social inclusion, leadership skills*, as well as *private sector engagement* are crosscutting issues. For unpacking the themes and issues there is a different guiding question each day:

- Day 1: How does turning the Paris Agreement Rulebook into action support NDC implementation?
- Day 2: What actions and innovations are driving NDC implementation and advancing development priorities?
- Day 3: How do we increase the pace and scale of change to bring the NDCs in line with the Paris Agreement?

Each day starts in plenary, to provide a high-level overview on the respective guiding question. In breakout sessions, participants then dive deeper into practical exchanges around integrated governance, finance mobilisation and transparency in response to the overarching question.

Three hundred fifty participants from national and subnational government, think tanks, the private sector, financial institutions, NGOs, and multilateral and bilateral organisations are expected to attend and contribute to the conference. **More info coming up at <http://www.globalndcconference.org>**
